

# **POLS8042**

**Quantitative Methods for Political Science**

# **AE 01 First Dataviz**

# UN Votes

- Go to RStudio Cloud and start AE 01 - First dataviz - UN Votes.
- In the Files pane (bottom right corner), spot the file called unvotes.Rmd.
- Open it and click “Knit”
- Then...
  - Go back to the file and change your name on top (in the yaml — we’ll talk about what this means later and knit again.
  - Change the country names to those you are interested in. Spelling and capitalisation must match how the countries appear in the data, so take a look at the appendix to confirm spelling.
  - Knit again. Congratulations! Your first data visualisation.

# UN Votes

- Go to RStudio Cloud and start AE 01 - First dataviz - UN Votes from the projects window.
- In the Files pane find the file called unvotes.Rmd.
- Open it and click “Knit”.
- Then...
  - Go back to the file and change your name on top (in the yaml — we’ll talk about what this means later and knit again.
  - Change the country names to those you are interested in. Spelling and capitalisation must match how the countries appear in the data, so take a look at the appendix to confirm spelling.
  - Knit again. Congratulations! Your first data visualisation.
